

## BUCKHORN TOURIST & INFORMATION CENTRE

**Project Description:**

Kawartha Capital was awarded the contract to construct a new tourist and information centre in Buckhorn for the Municipality of Trent Lakes. The intent of the design was to blend the building into its natural landscape surroundings, using natural wood materials. Low maintenance materials were selected for interior washroom facilities and special care was taken to integrate the mechanical equipment to blend with the overall design concept. Even though site conditions required additional excavation and engineering, we were able to complete the project on time for the scheduled public opening.

**Project Scope:**

- Reinforced poured concrete foundation
- Timber frame construction
- Stone veneer exterior finish
- Cedar shake roof
- Mechanical & electrical systems
- Fully accessible construction
- Feature display millwork

**Completion Date:** 2011
