

ANGEVAARE MAZDA

Project Description:

Kawartha Capital Construction undertook a complete building renovation, construction of two separate additions, a 1,200 sqft showroom and an identifier tower. The project involved renovating and upgrading the building to fit the new Mazda image program, which focuses on accessibility, creating a new showroom, parts and service area, and shop area. Office areas were renovated and all new interior finishes were installed throughout. Operations at the dealership were ongoing while construction and renovation were being done.

Project Scope:

- Selective demolition
- Interior demolition and re-finishing of showroom area
- New service department customer care area and offices
- New Parts offices and parts storage area
- New 4,300 sq ft pre-eng addition to shop including fire separations and overhead door installations
- Roofing modifications
- Mechanical building upgrades to include new exhausts systems in shop area (vehicle exhaust)
- Electrical building upgrades, distribution, new lighting
- Storm water management and parking lot upgrades

Completion Date:

May 2012
